

**In the Specification:**

On page 1, lines 18 to 20, last sentence, amend as follows:

-The diffuse light created by ~~these~~ scattering glasses is limited by the characteristics of light traveling through the delivery fiber and it is prone to problems such as uneven distribution of light and hotspots.-

Clean copy-

The diffuse light created by scattering is limited by the characteristics of light traveling through the delivery fiber and it is prone to problems such as uneven distribution of light and hotspots.

On page 6, sentence starting on 19, amend as follows:

-A laser diode (204) of 1W output from its 2 emissions surfaces is grounded on a water-cooled small heatsink and centered and incorporated in an inflatable balloon (202)(203) whose outside surface ~~is in~~ partially reflective to homogenize the irradiation energy.-

clean copy

A laser diode (204) of 1W output from its 2 emissions surfaces is grounded on a water-cooled small heatsink and centered and incorporated in an inflatable balloon (202)(203) whose outside surface is partially reflective to homogenize the irradiation energy.

On page 6, replace sentences starting on line 22 to line 26 as follows:

-The balloons are fed through a center channel (201). An external expandable sheath (205) may be used for flexibility reasons. Further embodiments of the invention may include devices powered by chemical luminescence, microwave and RF.-
